1. Product and company identification

Product name: Magnetic Sputter/Vacuum Deposition (MSVD) Coated Float Glass
Code: 01050
Synonym: This (M)SDS covers all PPG MSVD Low-E coated glass products including, but not limited to: Sungate® 400, Sungate® 400VT, Sungate® 460, Sungate® 460VT, Solarban® z50, Solarban® z50VT, Solarban® 60, Solarban® 60VT, Solarban® 67, Solarban® 67VT, Solarban® 70XL, Solarban® 70XVT, Solarban® 72VT, Solarban® R100VT, Solarban® z75, Solarban® z75VT, Solarban® 90, Solarban® 90VT, Solarphire™ HVM.

Manufacturer / Supplier: PPG Industries, Inc.
One PPG Place
Pittsburgh, PA 15272

Emergency telephone number: (412) 434-4515 (U.S.)
Technical Phone Number: 1-412-820-8500 (Flat Glass/Trade)

2. Hazards identification

Emergency overview: This product is considered an article. The end use is dependent upon the manufactured shape and design, and this article will not pose an exposure hazard under normal conditions.

Sanding and grinding dusts may be harmful if inhaled. May be irritating to eyes and respiratory system.

Use only with adequate ventilation. Wash thoroughly after handling.

Potential acute health effects

Inhalation: (Sanding and grinding dusts) May cause slight transient irritation.
Ingestion: Not a likely route of exposure.
Skin: (Sanding and grinding dusts) No significant irritation expected other than possible mechanical irritation.
Eyes: (Sanding and grinding dusts) No significant irritation expected other than possible mechanical irritation.

Over-exposure signs/symptoms

Inhalation: No specific data.
Ingestion: No specific data.
Skin: No specific data.
Eyes: No specific data.

Medical conditions aggravated by over-exposure

Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

This Material Safety Data Sheet has been prepared in accordance with Canada's Workplace Hazardous Materials Information System (WHMIS). See toxicological information (Section 11)
3. Composition/information on ingredients

<table>
<thead>

<td>65997-17-3</td>
<td>60 - 100</td>
</tr>
</tbody>
</table>

Composition consisting primarily of oxides of silicon with lesser quantities of other selected oxides common to soda-lime glasses, fused into an amorphous vitreous state.

Note: Glass sheets are typically stacked for shipment and may be separated with less than 1 weight percent of powdered interleaving material consisting of polymeric beads. Exposure to these polymeric beads is not expected to be a concern. MSVD glass may contain TPO (Temporary Protective Overcoat) made of polyvinyl alcohol. TPO is applied only to VT product versions. Exposure to polyvinyl alcohol is not expected to be a concern.

These coated glass products contain less than 0.1% of the following intentionally added metals (specific metals depend on product): silver, tin, zinc, nickel, chromium, aluminum, titanium and/or iron. Activities that generate dust from these coated glass products should be evaluated to determine if any regulatory exposure limits are exceeded. If exposure limits are exceeded for dust/metal, appropriate engineering controls (e.g., ventilation/HEPA filters) and/or personal protective equipment (e.g., respirators) should be provided.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Material Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

Eye contact: (Sanding and grinding dusts) In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Check for and remove any contact lenses.

Skin contact: None known.
Inhalation: None known.
Ingestion: Not a likely route of exposure.

Notes to physician: Treat symptomatically.

5. Fire-fighting measures

Flammability of the product: No specific fire or explosion hazard.

Extinguishing media

- Suitable: Use an extinguishing agent suitable for the surrounding fire.
- Not suitable: None known.

Special exposure hazards: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Hazardous combustion products: No specific data.

Special protective equipment for fire-fighters: No special protection is required.

6. Accidental release measures

Personal precautions: No special protection is required.

Environmental precautions: No specific hazard.

Large spill: Vacuum or sweep up material and place in a designated, labeled waste container.

Small spill: Vacuum or sweep up material and place in a designated, labeled waste container.
6. Accidental release measures

Reference to other sections: See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

7. Handling and storage

Handling: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator.

Take care with items that are sharp or heavy. Any glass can have sharp edges, particularly at a cut or fractured edge. Normal strength glass, also known as annealed or float glass, is known to fracture into large sections with sharp edges. Chemically strengthened or chemically tempered glass and thermally heat-strengthened glass will tend to fracture much the same as normal strength annealed glass, and are not considered safety glazing products. Thermally tempered glass (commonly known as fully tempered glass or safety glazing) will fracture into many smaller pieces still capable of cutting skin, but typically not as severely as would larger fragments from normal strength annealed glass. These safety concerns should be addressed with proper personal protective equipment to protect oneself against any sharp edges, including those formed by accidental glass fracture during handling. Sanding (a.k.a. seaming or edging) any sharp glass edges to produce rounded edges also reduces the hazards with being cut by sharp edges.

Storage: Store in a dry place away from excessive moisture and exhaust fumes from fork trucks or other such equipment. Support glass in cases on both sides when stored vertically. Glass packs and open cases should be stored at a 5° lean angle to prevent glass from falling forward.

8. Exposure controls/personal protection

Key to abbreviations

A = Acceptable Maximum Peak
ACGIH = American Conference of Governmental Industrial Hygienists.
C = Ceiling Limit
F = Fume
IPEL = Internal Permissible Exposure Limit
R = Respirable
S = Potential skin absorption
SR = Respiratory sensitization
SS = Skin sensitization
STEL = Short term Exposure limit values
TD = Total dust
TLV = Threshold Limit Value
TWA = Time Weighted Average

Consult local authorities for acceptable exposure limits.

Recommended monitoring procedures: Not applicable

Engineering measures:
8. Exposure controls/personal protection

Hygiene measures
Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protection

Eyes
Safety glasses with side shields.

Hands
Rubber dipped anti-lacerative gloves are recommended.

Respiratory
(Sanding and grinding dusts) If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Skin
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Additional information
Glass Handler's cuffs, sleeves, chaps, neck protection and aprons. Also, hard hat when glass is lifted above the shoulder. Steel-toed safety shoes, with metatarsal protection, are recommended.

9. Physical and chemical properties

Physical state
Solid.

Flash point
Closed cup: Not applicable. [Product does not sustain combustion.]

Auto-ignition temperature
Not applicable

10. Stability and reactivity

Stability: The product is stable.
Conditions to avoid: No specific data.
Materials to avoid: No specific data.
Hazardous decomposition products: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Possibility of hazardous reactions: Not applicable.

11. Toxicological information

Acute toxicity
Conclusion/Summary: Not available.

Chronic toxicity
Conclusion/Summary: Not available.

Irritation/Corrosion
Skin: Not available.
Eyes: Not available.
Respiratory: Not available.

Sensitization
Skin: Not available.
Respiratory: Not available.

Target organs: (Sanding and grinding dusts) Contains material which may cause damage to the following organs: upper respiratory tract, skin, eyes.

Carcinogenicity

Carcinogen Classification code: ACGIH: A1, A2, A3, A4, A5
IARC: 1, 2A, 2B, 3, 4
NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen
Not listed or regulated as a carcinogen: -

12. Ecological information

Environmental effects: No known significant effects or critical hazards.

13. Disposal considerations

Waste disposal: The generation of waste should be avoided or minimized wherever possible. Glass products with MSVD coatings and silver containing dusts generated during grinding removal of the MSVD coating may be recycled. The disposal requirements for waste dust should be based upon testing conducted in accordance with federal, provincial, state, and local requirements.

Disposal should be in accordance with applicable regional, national and local laws and regulations.
Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
